Program:  

TechBridge Summer Academy

Program Description:  
TechBridge focuses on building students’ academic performance in math and reading through technology. Exposing students to science and engineering is also an emphasis of the program. Exposure to these subjects are best learned when the students engage in the academy’s featured activity. As part of the program, each student builds his or her own computer, which is used the duration of the academy to complete assignments.

In addition, campers gain leadership skills by participating in a leadership and character development program. They will also be introduced to various professions through the academy’s career exploration component. At the end of the camp, if students successfully complete the program requirements, their hard work will be recognized by being rewarded with the
